Control units

Single-axis ■ BASIC UNIVERSAL

Regardless of your preferred type of control communication, BASIC UNIVERSAL offers you a wide range of industry-standard interfaces. As a result, this control unit is well suited for a variety of applications – including those in your industry. The correct interface for connecting the IndraDyn motors or other standardized encoders, such as Hiperface®, is already integrated. In addition, this control unit has an empty slot for the connection of another encoder, connection of the analog I/O extension or for the emission of emulated encoder signals. An additional plug-in MultiMediaCard gives you the option of simple transmission or duplication of your drive parameters. This card can also be used to expand the memory for the motion logic integrated in the drive (firmware option). For an easy start-up use a PC with the Rexroth IndraWorks engineering framework.
